45.	Simon Smith	Lieicester, United Kingdom	I helped David Butler at The University of Manchester collect and archive some of Deila's work that was being kept by Mark Ayers. Going through the tapes I heard first hand how she was able to manipulate sound that was ahead of its time. This resource is extremely valuable to those leaning about sound now but also to our wider cultural heritage. She was a pioneer and should be talked about alongside Pierre Schaffer and Karlheinz Stockhausen. However I urge the BBC to commit to archiving this important phase in our musical and televisual history not only Delia's outstanding contribution. Furthermore I hope the release of her work is properly credited and handled with respect for her family and colleagues not simply as a money making scheme. Many thanks.

93.	Ryan Gaston	Little Rock, AR	Whether or not Delia Derbyshire is a musical genius is no longer open to debate. Despite the relative lack of availability of her music, she has become an icon of electronic music. She not only has the capacity to become part of textbook historical line of the development of electronic music, but also the capacity to become part of the textbook historical line of women's roles in the arts in general. It is a shame to keep such an exceptional artist's works out of the public eye. Keeping this work hidden not only denies her the credit she deserves, but also denies her proper place in musical history.

156.	Tim Sheppard	Bristol, United Kingdom	Since Delia was kept anonymous by the Radiophonic Workshop, it's the least the BBC can do to share the compositions and development of this important musical innovator with the people whose licence fees funded her.
157.	Anthony Seaton	Nuneaton, United Kingdom	Please release all material, and finally afford Delia the recognition and audience she so rightly deserved during her brief time in this transitory life. To argue that her work "belongs" to the BBC is no excuse; the BBC belongs to the license-payers!
158.	Peter Castine	Berlin, Germany	Although I am currently at an overseas address, I lived and worked in the UK for several years (and paid BBC license fees in full!). Delia Derbyshire's work at the Radiophonic Workshop is legend, despite having been sadly underrepresented (in part due to BBC policy of the day). It would be fitting and right for the BBC to allow the widest possible access to Derbyshire's music stored in their archives.

172.	Phil Taylor	Stoke, United Kingdom	Come on guys you've sat Delia Derbyshire's work long enough. She didn't get any credit during her time at the Radiophonic Workshop and the Dr Who theme has been tastelessly rehacked and reworked over the years - damaging a piece of artwork. Surely it's time to show some long overdue respect to the author?

Our families were well acquainted, and her father was affectionately known as 'Uncled Ted'. He was a great cricket fan and it was always a pleasure when the families got together. Once I took her to a performance of the 'Mikado'. Hopefully Delia's music will survive the test of time equally as well as the operas of Gilbert & Sullivan.

It's hard to overstate just how important Delia's BBC work was to the history of electronic music in mass culture. In this 50th anniversary year, I still vividly remember the impact of the first broadcast of her Dr Who theme arrangement on my childhood sense of what sound could do and be. There'll never be a better moment to remember someone who frankly should never have been forgotten in the first place. [Unrelatedly, could Care2 perhaps remove the requirement for non-US petitioners falsely to claim residence in a US state?]

1,087. Kurt Phillips	Fredericksburg, VA	Artists like Delia were way ahead of their time, it would be a crime against art for some much of her work to go unpublished.
1,088. David Calvo	Paris, France	
1,089. Vince Sipocz	Osceola, IN	I would love to hear any new material, if there is any. Either way, she was a musical genius, and a big inspiration to me.
1,090. Valla Serge	Saint Étienne, France	
1,091. Stuart Glen	Ottawa, Canada	From what I understand of her sad story, Delia chafed under the BBC's policy of anonymity. By withholding her work from release, even to this day, she is still being kept in a cage. Music exists to be heard. Set it free.

1,114. Keira Finnegan	Staines-upon-Thames, United Kingdom	Delia was a true innovator, and a huge source of inspiration to me personally. It's criminal and quite saddening that there's more of her work we haven't yet heard, and might not hear if the BBC keeps it that way. Publish the work and let others discover her groundbreaking material!

1,143. Robin Monks	Glossop, United Kingdom	The original Dr Who theme is an iconic piece for my generation, but it is only a tiny part of a body of work that cries out for a larger audience.
1,144. Michael Waynick	Holland, MI	All these decades later, popular music has yet to catch up with Ms. Derbyshire and her peers at the BBC Radiophonic Workshop. Toiling away in near-criminal obscurity, they created a vital body of work that represents an important contribution to 20th century music. Just to take one example, the mesmerizing "Inventions for Radio" are audio art of the highest order. The BBC should be proud to expose such masterpieces to the world.
